Subject: MLPAComments: Support for ackage 2

Dear Srs,

I'm writting to ask you to support the Package 2 in its current uncompromised form. This package offer a buffer zone that will protect and benefit the Point Lobos Marine Reserve. We have been monitoring the juvenile population of rockfish north of the current boundary of the part. We have documented many species of Juv. Yellow Eye rock fish, one of the species that needs a lot of protection due to their long period of time before reaching maturity. Many of these animals are in areas outside the current Point Lobos Reserve and should be protected in order to help the juv become healthy adults. We have monitored their habitat and find out that they stay within 50ft of small cracks crevices, which make their habitat very important to protect.

Please support the Package 2 in its current uncompromised form.

Thanks a lot
Alberto Nava
